

UNNIKRISHNAN V P

MERN Stack Developer

Trivandrum, Kerala | +91 8848853516 | unniytman@gmail.com | www.unni.rheox.online

CAREER SUMMARY:

MERN Stack Developer with close to one year of hands-on experience building and deploying full-stack applications. Experienced in integrating AI-assisted workflows and currently expanding expertise in DevOps practices and VPS-based deployment to deliver scalable, production-ready solutions.

WORK EXPERIENCE:

Srishti Innovative

MERN Stack Developer | April 2025 – Present

- Worked on real-world full-stack applications to strengthen development practices.
- Develop and maintain scalable full-stack web applications for clients.
- Collaborated with team members to implement new functionalities and fix bugs.
- Utilized AI-assisted tools to improve development efficiency, debugging, and code optimization.

Riss Technologies

MERN Stack Intern | September 2024 – December 2024

- Built and tested full-stack web applications using the MERN stack.
- Assisted in developing REST APIs and integrating frontend with backend services.
- Gained practical experience in version control (Git) and real-world development workflows.

PROJECTS:

Rheox Cloud | A Discord.js Project

- Developed a full-stack Discord bot with an integrated web dashboard for managing server features and configurations.
- Implemented advanced functionalities such as moderation, automation, and customizable commands for server management.
- Developed a React-based dashboard to manage bot configurations, user interactions, and real-time data.
- Designed scalable backend services using Node.js and Express to handle bot logic, API integration, and performance optimization.

RENDER BLOB | 3D Portfolio

- Developed an immersive 3D portfolio using Three.js with interactive scenes and real-time rendered elements.
- Implemented smooth GSAP-based animations and scroll-driven transitions for engaging user experience.
- Designed animated 3D models with realistic lighting, shadows, and camera movements to enhance visual storytelling.
- Built a fully responsive and performance-optimized portfolio ensuring smooth rendering across devices.

Portfolio Builder | Prompt Generator

- Developed a dynamic portfolio builder that generates complete portfolio code based on user-provided data.
- Implemented AI-powered prompt generation to assist users in creating personalized portfolio content and structure.
- Enabled export options including structured JSON data and ready-to-use code for flexible customization.
- Designed a user-friendly interface to simplify portfolio creation without requiring advanced technical knowledge.

Niche | Digital Marketing Service

- Developed a digital marketing platform where content creators can register and participate in a referral-based earning system.
- Implemented an affiliate system enabling users to promote company products and track referrals.
- Integrated secure payment processing using Stripe for seamless product purchases.
- Built a full-stack application to manage users, products, and transactions efficiently.

EDUCATION:

2021 – 2024 | Kannur University, Kerala
Bachelor of Computer Applications (BCA)

SKILLS:

- Full-stack web development (MERN Stack: MongoDB, Express, React, Node.js)
- Frontend development (JavaScript ES6+, HTML5, CSS3)
- Database management (MongoDB, MySQL – basic)
- Tools & platforms (Git, GitHub, Postman, AWS – basic, Linux)
- Deployment & hosting (Vercel, Render, VPS panel hosting)
- Docker (basic), microservices architecture, AI-assisted development workflows
